

# Enhancing logistics capabilities based on existing portfolio

Supporting day-to-day business and all types of operations across the enablement spectrum

Jacek Pachocki, NCIA, ACQ CE&A

Haarlem, NL 2019/10/07-09

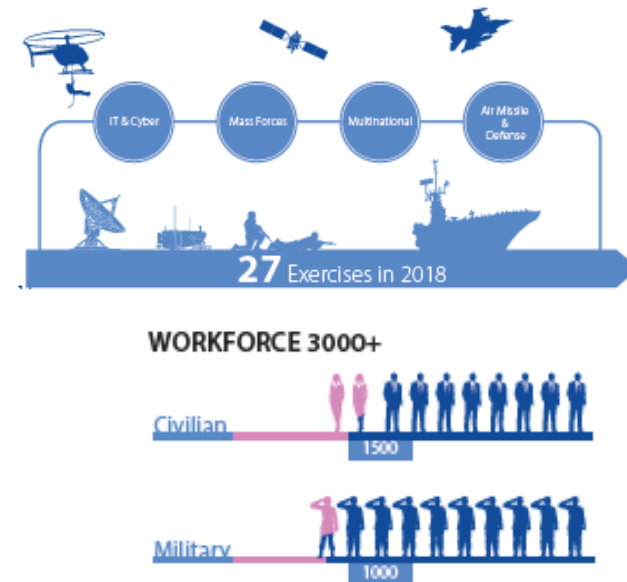

**IWSM** MENSURA

**HAARLEM 7-9 OCTOBER 2019**

# NCI Agency

## Connects NATO, Nations & Forces

- We are NATO's technology and cyber leaders.
- We help NATO Nations communicate and work together in smarter ways.
- Our solutions underpin NATO's ability to perform Article IV (consultation) and Article V (command and control).

# The Netherlands – leader in flowers and plants

- Area of greenhouses ~10.000 ha
- Area of the municipality of Haarlem ~3.200 ha
- Total worth of flower export ~ EUR 6 bln
- 2.1% of total national export, EU-15 0.1%
- Number of exporting companies ~ 700

V.1.0

# Keeping the business running

- Key enabling processes
  - Business (operational) processes
  - Organizations
  - Technologies
  - Information

# Putting it together => Flora Functional Services (Flora FS)

## Logistics Applications

Logistics Coordination

Supply & Services

Movement & Transportation

Infrastructure Engineering  
Support

## Disease Control Applications

Disease Control Planning

Disease Control Management

Plants and Flowers Health  
Surveillance

## Budget & Finance Applications

Financial Management

V.1.0

# Logistic Applications

## Objective:

“To provide the **flower industry** with the greatest logistics flexibility for the conduct of its operations”

- Optimum use of existing assets and capabilities;
- Additional functionality for the requirements that are not currently supported;
- Logistics situational awareness;
- New technologies;
- Prevention of degradation.

V.1.0

# Disease Control Applications

- More efficient use of research and treatment facilities;
- More efficient allocation of resources;
- Improved efficiency of logistics support through collective provision;
- Improved decisions taken by the Disease Control Authority;
  - Based on multi-source information;
  - Disease Reporting containing timely and aggregated information.

# Budget & Finance Applications

- Flexible reports and charts;
- Means of internal control and governance;
- Streamlined financial statements;
- Improved suppliers management;
- Improved management and tracking of projects and costs;
- Improved Budget Planning;
- Documents from mobile devices.

V.1.0

## FLORA FS Programme

### Candidates for Re-use

Agri FS

Flora Supply System

Legacy systems as  
potential re-use  
candidates

V.1.0

## FLORA FS Programme

### Candidates for Re-use

Agri FS

Flora Supply System

Alfa Flower Logistics

Beta Plant Disease  
Control

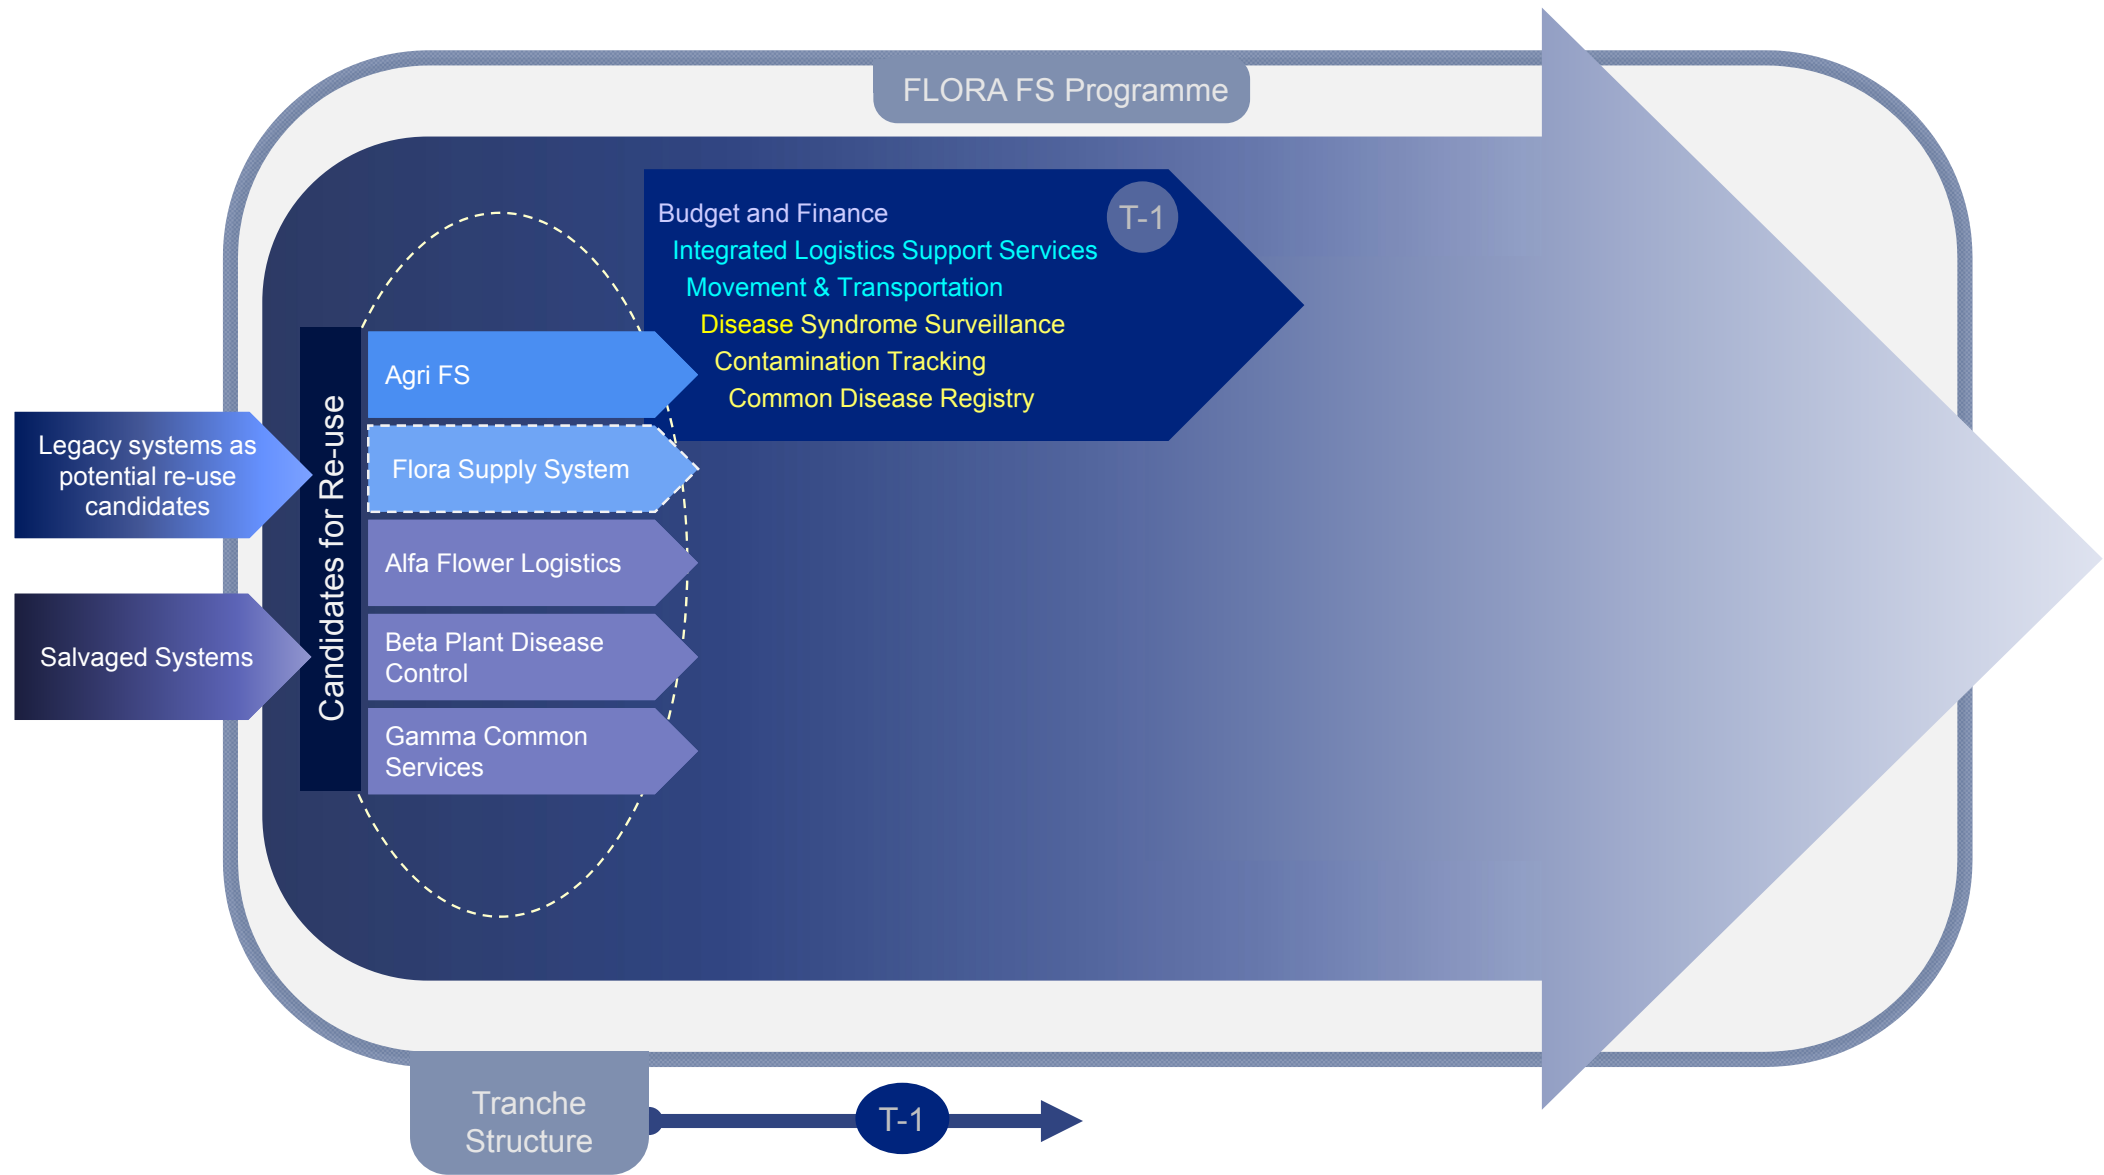

Gamma Common  
Services

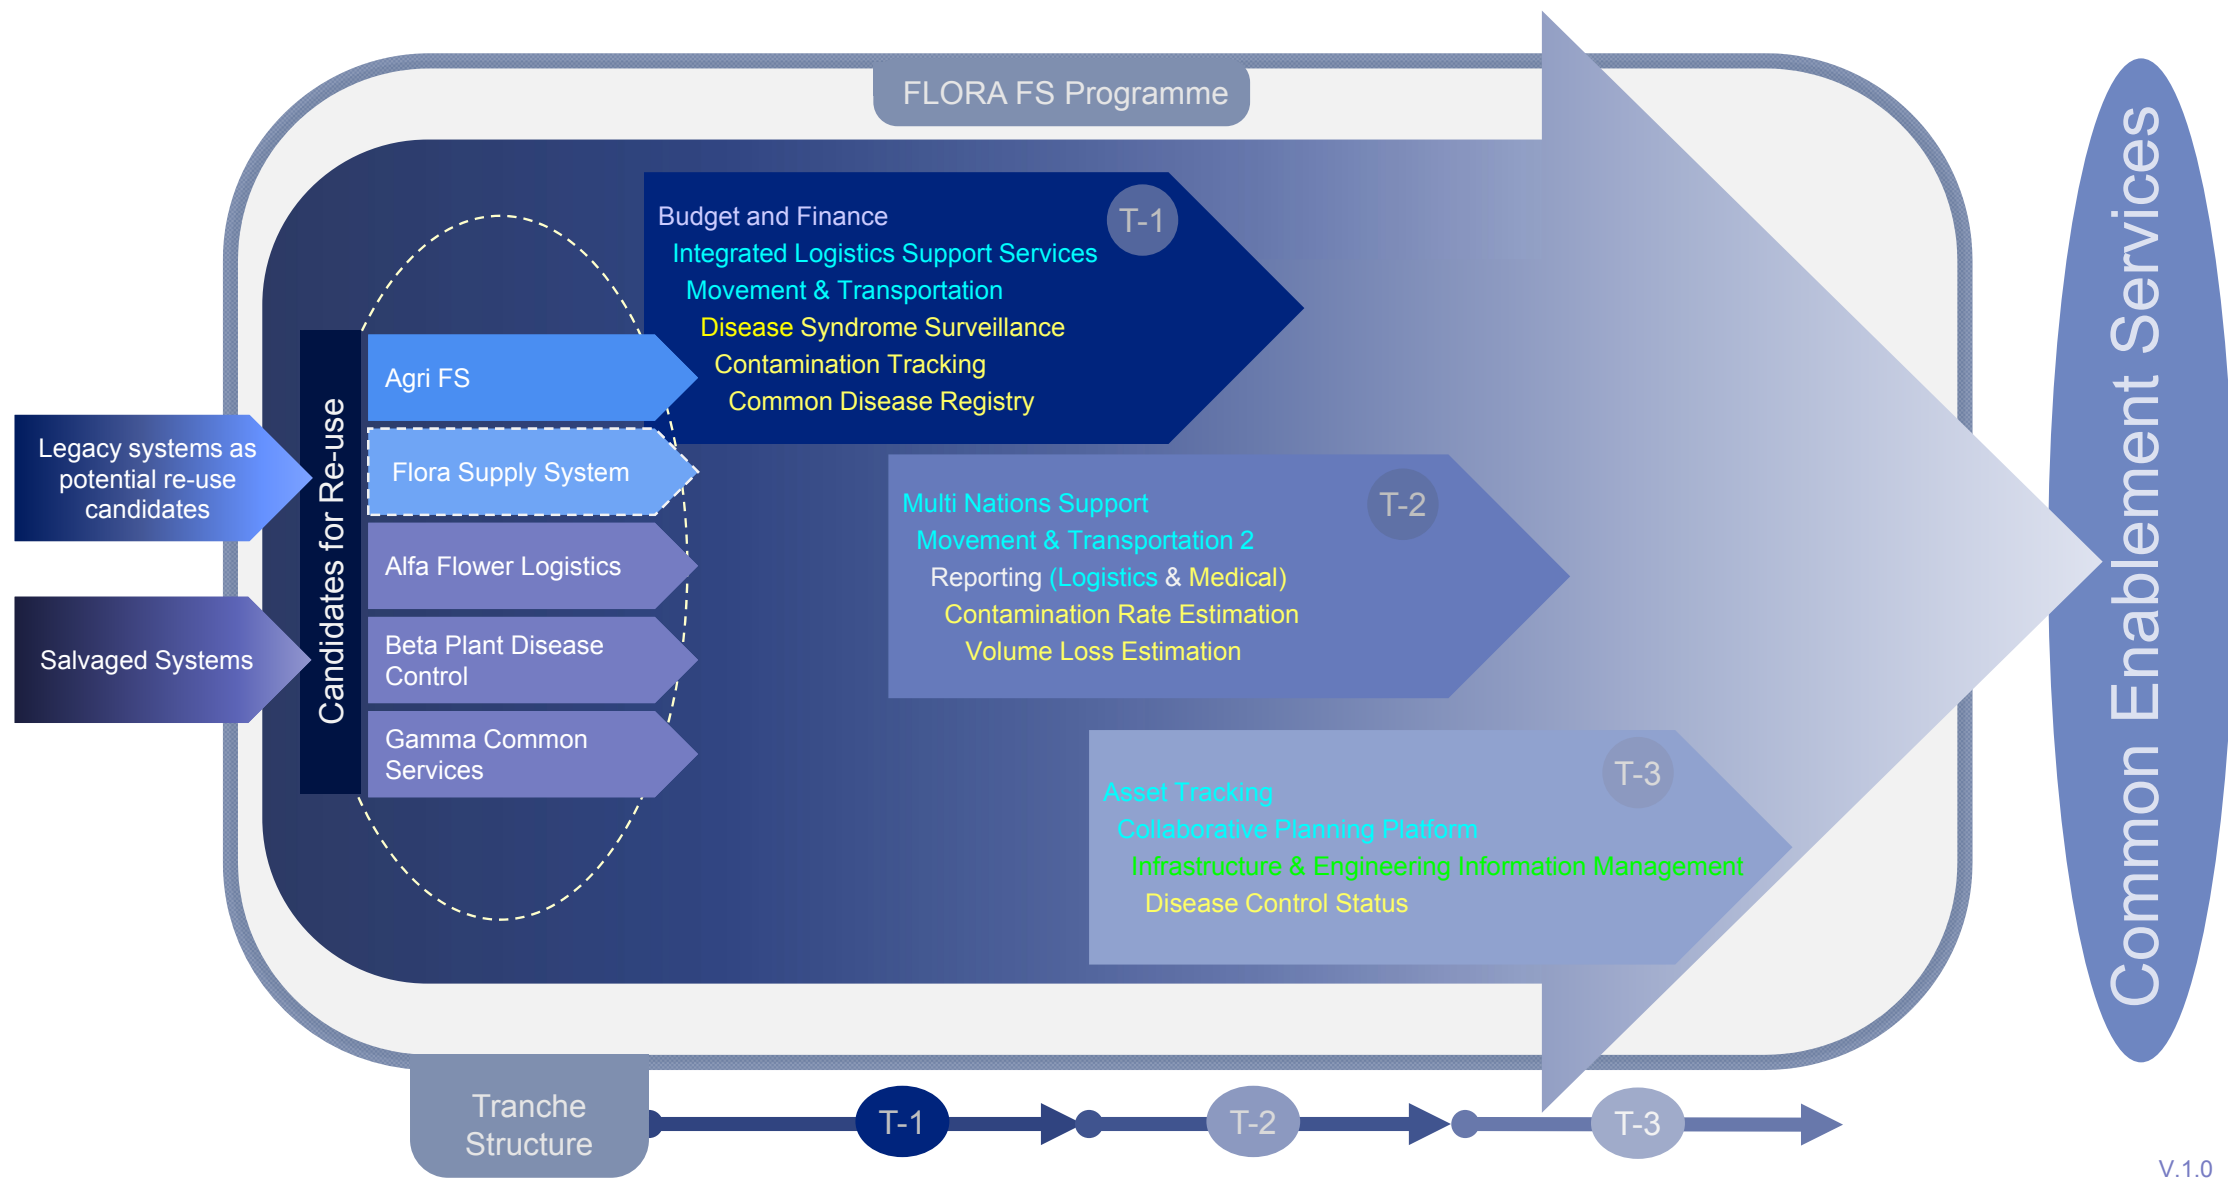

Legacy systems as  
potential re-use  
candidates

Salvaged Systems

V.1.0

V.1.0

# Sizing and Estimating the SIPs (Software Intensive Projects)

- ~ 2.500 requirements (Flora FS)
- ~ 450 requirements (Tranche 1)
- 9 applications
- 97-17 reqs/app
- Function Point Analysis (IFPUG)

# SEER for SEM model

- Platform:
  - Business and Non-Critical Management Information System
- Application:
  - Decision Support System
- Acquisition methods:
  - General – new and pre-existing;
  - Modification, Major;
  - Salvage Code
- Development Method:
  - Agile

# SEER for IT model

- Deployment:
  - Production Environment;
  - Test Beds
- Data Migration;
  - Uninterrupted service
- Training:
  - Lot of users;
  - Class and eLearning;
- Documentation:
  - Introduction Guide, User Guide, Quick Reference, Troubleshooting Manual, Comprehensive Help

# Generating Type B Cost Estimate

- Project Cost Summary;
- Expenditure Profile;
- O&M;
- LCC
